CANTESCO®
welding chemical products

FEATURES AND BENEFITS

- Increases productivity
- Reduce running costs for consumables
- Excellent adhesion of coating
- Spray coating dries within seconds

Designed and developed to prevent spatter build-up on Welding equipment and substrates such as MIG tips, nozzles, fixtures and jigs. CANTESCO® Ceramic Anti-Spatter provides long lasting protection; a single coating provides protection for up to eight “consecutive” hours of welding.

Unlike formulations that stay liquid after application, CANTESCO® Ceramic Anti-Spatter dries to form a solid, durable coating, ensuring that anti-spatter residues do not drip into the weld to cause contamination or porosity. Cleans off easily with common solvents.

COMPOSITION

CANTESCO® Ceramic Anti-Spatter is boron nitride based protective coating with a fast drying carrier/binder mixture. The product is silicon and halogen free.

AVAILABILITY

CANTESCO® Ceramic Anti-Spatter is available in a ready to use aerosol form. Shelf life for this product is two years from date of manufacture. Product is available by contacting sales@cantesco.com

ITEM	CODE	SIZE	QTY
CRM-16-A	699913-12570	16 oz aerosol	12 cans per box

The CANTESCO® Ceramic Anti-Spatter will increase productivity, increase the life of your consumables and save you time and money.

Pre-treatment of tips

Dries to form a solid, durable coating, ensuring that anti-spatter residues do not drip in the weld.
